PROFILE

I'm a Fullstack web developer having skills to create web applications using HTML, CSS, Javascript, Bootstrap, React, Redux, Node.js And MongoDB. I have experience in developing and maintaining applications based on React Js and Node.Js. I am an organized, detail-oriented and hardworking professional, who is always eager to learn new technologies and trends in web development. Furthermore, I have the ability to optimize web applications for better performance and user experience.

PROFESSIONAL EXPERIENCE

July 2022 – Present

Internship

Skillhub IT Solutions –Aurangabad,

- During my internship I had opportunity to work various MERN stack projects, including creating web applications using MongoDB, Express, React, and Node.js. I also had the opportunity to work on back-end and front-end development.
- I was part of a team that was developing a web application for a company.
- I also gained experience in working with version control systems, such as GitHub.
- This experience gave me a good insight into the entire web development cycle.

PERSONAL PROJECTS

Travelicious (Tour Booking)

- This project was focused on creating an online booking system for tour operators. Goal was to make it easier for people to book tours and travel packages online.
- Developed back-end admin panel to manage tour packages and customer information.
- Also Integrate a payment gateway to process payments and Continue-With-Google for easy SignUp.

MakeOver (Appointment)

- I created Makeover Appointment to give customers convenient and straightforward way to book appointments for makeovers.
- The app allowed customers to select their preferred makeover, enter their personal details, and book an appointment according to their availability.
